

Mobile battery submersible pumps suitable for irrigation and pumping in the absence of power supply. They are powered by a Li-ion battery pack included with the charger.

Construction characteristic

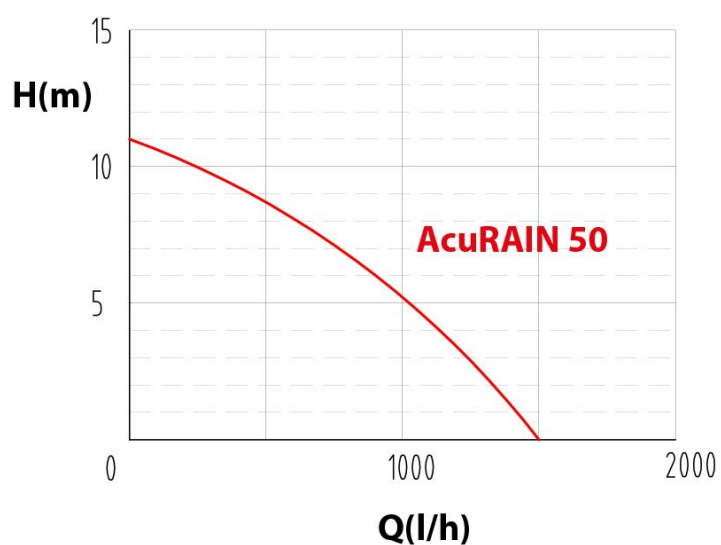

- battery charge indicator
- easy maintenance
- low pump weight
- standard connection to quick couplings
- shut-off valve

Aplikace

- it is suitable where there is no electricity
- for irrigation of flower beds, flowers
- service water pumping from barrels and collecting tanks

Accessory

- battery capacity 12 V / 2Ah
- battery life approx. 30 minutes

Type:	ACU pump
Q max:	l/h
Head high:	11 m
Voltage:	V
Weight:	kg
Max. temperature:	35 °C
Motor power:
