

## Pond lighting

The light is designed on a solid base and features an adjustable beam angle and an automatic dimming sensor. The light can be used both on land and underwater.

After sunset, you can create a unique atmosphere in your garden with a play of light. Enjoy the harmony of colorfully glowing water that refreshes your mind and spirit.

## Construction characteristics

- metal body
- adjustable tilt angle
- base or stake for ground mounting
- transformer
- 10 m flexible cable

## Usage

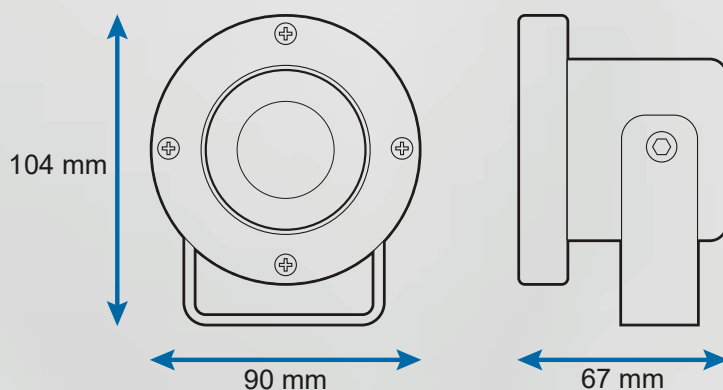

- protection rating IP68 (transformer IP44)
- maximum liquid temperature 35 °C
- maximum submersion depth 1.5 m

## Applications

- can be installed both on land and underwater
- pond lighting
- water world

## Technical parameters

TYPE	JPL 4
Power supply	Transformer 12 V/50 Hz
Power input	35 W
Lenses	1x white (warm white light)
Cable length	10 m
Weight	2.5 kg

## Base or ground stake for securing into the ground
