

Submersible pump with impeller and cutting device for pumping wastewater and slurries containing fiber. The pump is equipped with 10 m cable, float switch and built-in thermal motor protection.

Construction characteristic

- pump body of cast iron GG20
- steel impeller ZG 35
- cutting wheel and grinder of ZG40Cr
- Stainless steel shaft 2 Cr13
- double mechanical seal (C/Ceramics, SiC/SiC)

Motor

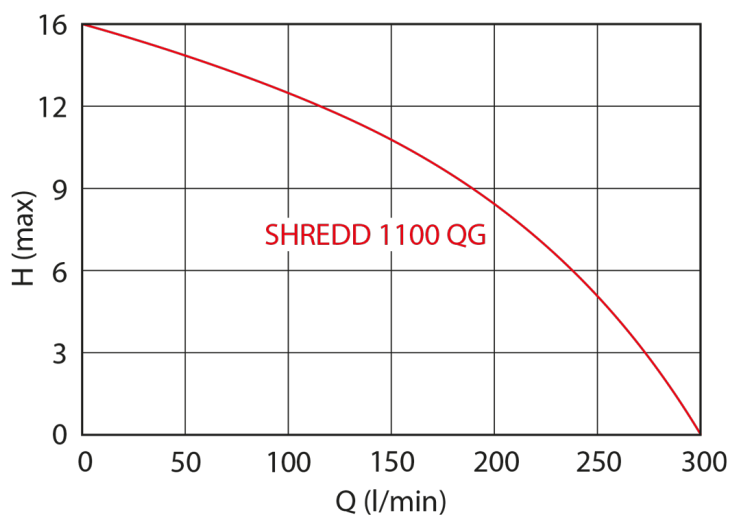

- Stainless steel shaft
- dry-run motor
- degree of protection IP 68
- insulation class B
- single phase version with built-in condenser
- speed 2800 rpm
- single phase version with float switch
- max. switching time 30/hour
- power cable H07RN-F 3x1 mm

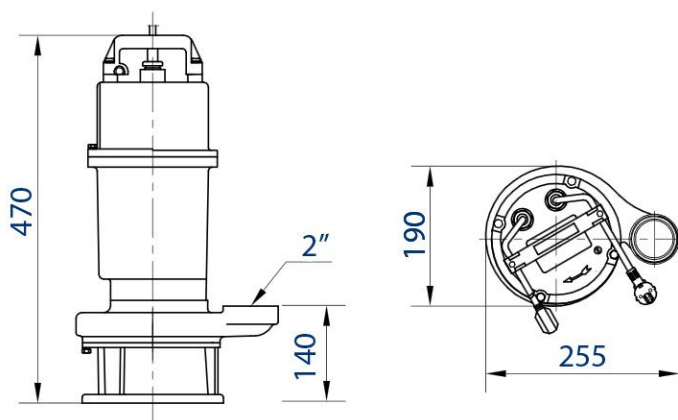

Usage

- type of liquid: sludge and wastewater with solid particles and fiber
- max. pumped liquid temperature 40°C
- pump head height 16 m

Aplikace

- use in industry, in the home
- pumping of waste water and sediments with textile fibers
- liquid chemically compatible with pump material

Type:	SHREDD 1100 QG
Power input:	1100 W
Q max:	18 000 l/h
Head hight:	16 m
Voltage:	230 V
Weight:	33 kg
DNM dimensions:	2" - 2 1/4"
Connection:	2" - 2 1/4"
Max. temperature:	40 °C
