

The containers are suitable as containers for clean or service water under atmospheric pressure. They are lightweight, storable and easy to handle.

## Construction characteristic

---

- made of high-density non-toxic linear polyethylene
- have a monolithic construction without critical points

## Usage

---

- are suitable as reservoirs of pure or service water under atmospheric pressure

## Technical parameters

---

- are resistant to UV radiation, algae formation, temperature fluctuations, impact and chemicals
- resistant to temperatures up to 60°C
- they can be easily cleaned with conventional cleaning agents
- they are light, storable and easy to handle
- when installing, it is necessary to put the tank in a horizontal position

<b>Type:</b>	H 2100
<b>Diameter:</b>	1790 mm
<b>L dimensions - lenght:</b>	mm
<b>H dimensions - height:</b>	1240 mm
