

All stainless steel pumps suitable for pumping polluted water from waste pits and excavations. A double seal, two capacitors and a material design make this model for professional use.

Construction characteristic

- pump body of stainless steel AISI 304
- stainless steel impeller AISI 304
- Stainless steel shaft
- special double mechanical seal ceramic/carbon, silicon/silicon
- handle and suction body of stainless steel AISI 304

Motor

- degree of protection IP 68
- insulation class B
- single phase version with 2 built-in condensers
- thermal protection in the motor winding
- speed 2850 rpm
- flexicable 10 m H07RNF
- version with float switch

Usage

- type of liquid: waste water with fixed impurities up to 50 mm
- max. pumped liquid temperature 35°C
- max. height 14 m

Aplikace

- pumping of heavily polluted sewage from pits, cellars, tanks

Type:	1500
Power input:	1500 W
Q max:	500 l/h
Head high:	m
Voltage:	230 V
Weight:	19 kg
Cable length:	10 m
A dimensions:	465 mm
B dimensions:	100 mm
C dimensions:	190 mm
DNM dimensions:	2"
Connection:	2"
Max. temperature:	35 °C
