

The tanks are suitable as containers for clean or service water under atmospheric pressure. They are lightweight, storable and easy to handle.

Construction characteristic

- made of high-density non-toxic linear polyethylene

Usage

- are suitable as reservoirs of pure or service water under atmospheric pressure

Technical parameters

- are resistant to UV radiation, algae formation, temperature fluctuations, impact and chemicals
- resistant to temperatures up to 60°C
- they can be easily cleaned with conventional cleaning agents
- they are light, storable and easy to handle

Type:	S 500
G dimensions:	255 mm
L dimensions - lenght:	1270 mm
H dimensions - height:	725 mm
C dimensions:	720 mm
D dimensions:	310 mm
E dimensions:	300 mm
F dimensions:	100 mm
F dimension:	100 mm
H1 dimensions:	45 mm
H2 dimensions:	670 mm
Connection:	1"
Tank volume:	500 l
Inlet size:	310 mm
