

The tanks are suitable as containers for clean or service water under atmospheric pressure. They are lightweight, storable and easy to handle.

Construction characteristic

- made of high-density non-toxic linear polyethylene
- have a monolithic construction without critical points

Usage

- are suitable as reservoirs of pure or service water under atmospheric pressure

Technical parameters

- are resistant to UV radiation, algae formation, temperature fluctuations, impact and chemicals
- resistant to temperatures up to 60°C
- they can be easily cleaned with conventional cleaning agents
- they are light, storable and easy to handle

Type:	K 200
P dimensions:	690 mm
G dimensions:	210 mm
L dimensions - length:	590 mm
H dimensions - height:	570 mm
W dimensions - width:	590 mm
A dimensions:	480 mm
B dimensions:	50 mm
E dimensions:	420 mm
F dimensions:	310 mm
Inlet connection:	1"
Tank volume:	200 l
Inlet size:	210 mm
